

B: Synchrotron Light / Free Electron Laser

Wednesday 6 October 2021 09:00 (45 minutes)

I have two suggestions, a short paper (in attachment) and a longer one (CHAPTER 1 The Physics and Status of X-ray Free-electron Lasers (RSC Publishing) DOI:10.1039/9781782624097-00001. In the latter the students might find some clarifications after the lecture, the former helps to introduce the subject.

Presenter: CURBIS, Francesca
